C:/Users/alimd/OneDrive - University of Cambridge/Tools/cctu/vignettes/Progs/analysis.R
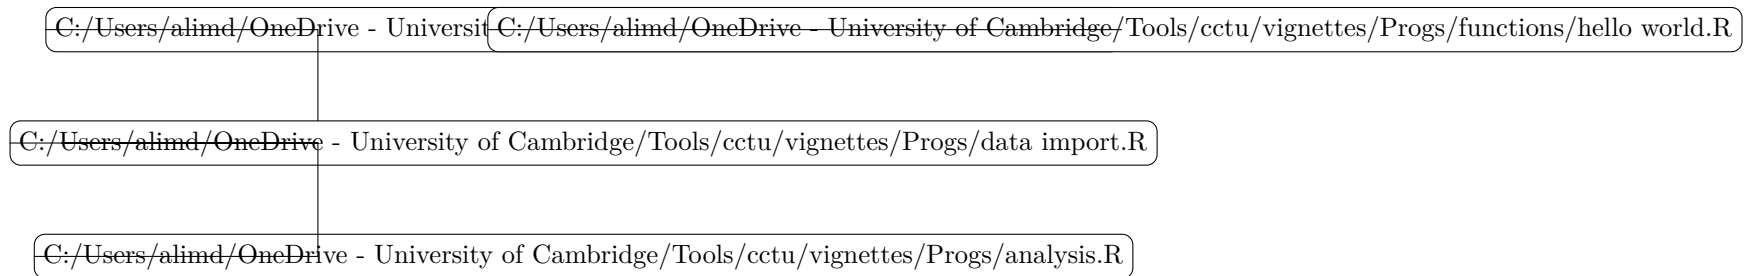

Real Usage

This is generated a stand alone vignette, but really it woudl be called from a call in `main.R` like

```
render("Progs/code_tree_doc.Rmd",
       output_file ="Vignette Code Tree.pdf",output_dir = "Output/Reports",
       params=list(my_author="Simon Bond",
                   my_title= "Vignette Code Tree")

)
```

NB use the file `/doc/Progs/code_tree_docs.Rmd` and not the similarly named one within `/doc` . Building vignettes requires these two slightly different versions.
